# MOVABLE FLOORS

FOR COMMERCIAL & PRIVATE POOLS

SPACE - SAFETY - VALUE - IMPRESS

”Luxury is attention to detail,  
originality, exclusivity and  
above all quality.”

Angelo Bonati - Panerai

## UNIQUE CONCEPT

Do you have a swimming pool, but would you also like to use the space for something else? Or are you unsure whether you want to furnish your basement as a swimming pool or rather as a living space? With the unique, movable floors of Holland Aqua Sight B.V. you don't have to choose!

Amaze yourself and your guests with the space created when using a movable floor. Within five minutes you can transform your garage, terrace, guest room or party room into a swimming pool. This way you double your space!

Finished swimming? Bring the entire floor up again with a push of the button and the space becomes a garage, living space or party room again. You can swim during the day and put tables and chairs on it in the evening.

Our movable swimming pool floors are rock solid due to their unique buoyancy. They are suitable for private swimming pools and commercial pools for hotels and resorts. The movable pool floor is completely made to measure and can be covered with any material. From wood or marble to completely transparent.

## DOUBLE YOUR SPACE

Get the most out of every space. From living space or terrace to swimming pool, or from swimming pool to garage or party room. Almost every scenario is conceivable. Your home comes to life with a movable pool floor!

Our movable floors are also very suitable for hotels: you can turn your breakfast room into a swimming pool at the push of a button, and in the evening you serve dinner here. Dare to dream about the possibilities that a movable floor offers. With our modern techniques we make something extraordinary out of it!

## SAFETY FIRST

Safety for you and your swimming guests is always paramount. You can therefore adjust the depth of the pool floor to your liking. If children are swimming, a depth of half a meter or less is enough. If young people or adults swim, you can lower the pool floor further.

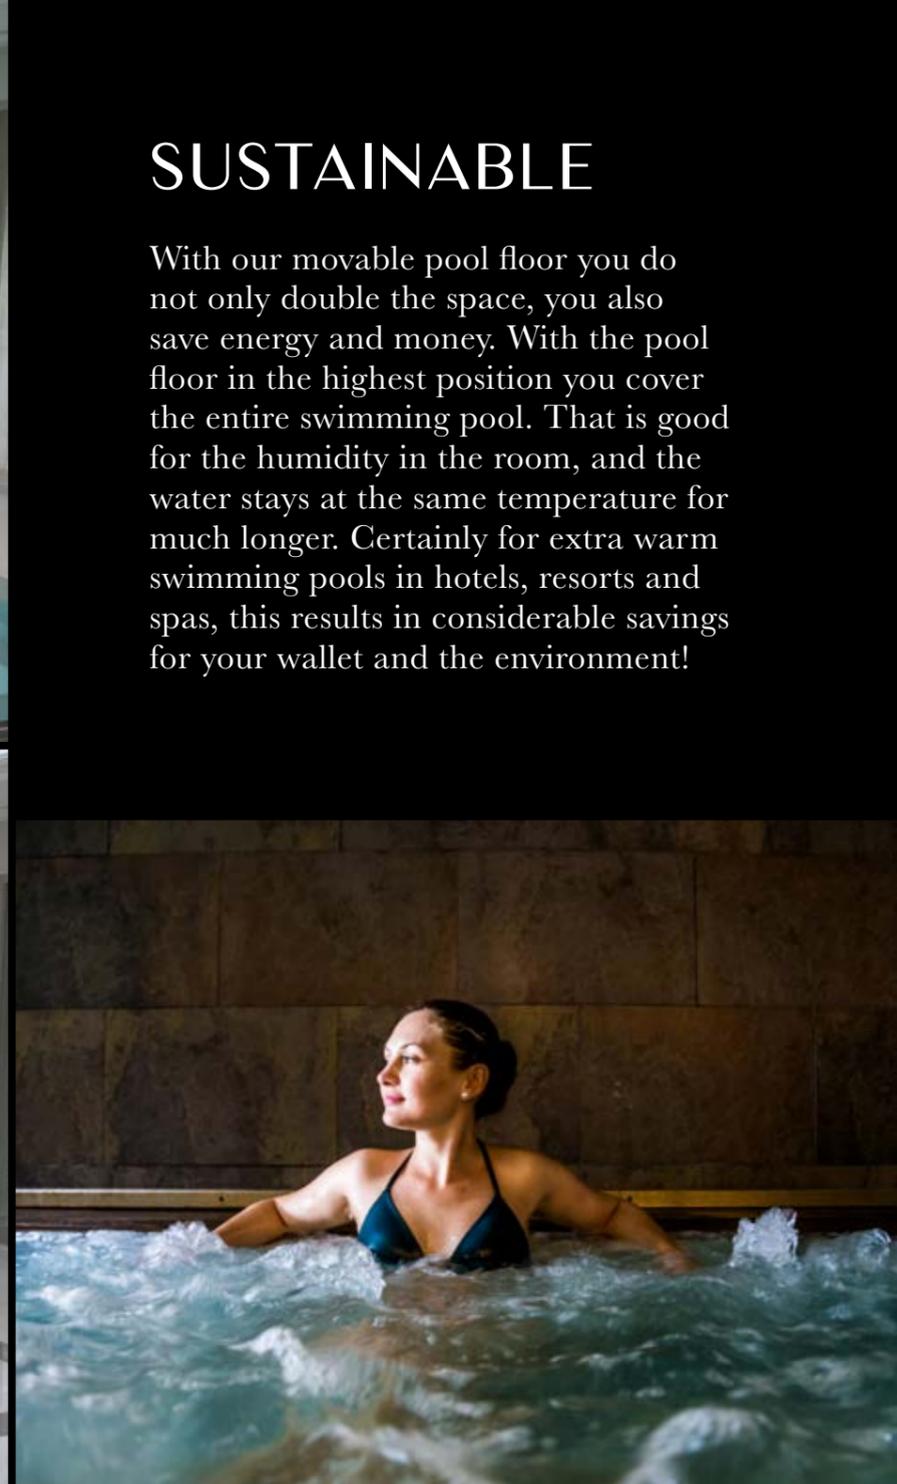

Safety first! Our movable floors meet the highest requirements. Only the best is good enough. Our system is smart, advanced and waterproof, and we have developed it based on years of experience with public swimming pools.

## IMPRESS YOUR GUESTS

Amaze your guests with the space created by a movable floor. Within five minutes, your garage, guest room or party room can be turned into a beautiful swimming pool. Or offer them the opportunity to swim outside in the afternoon, and turn the pool into a beautiful terrace with a push of a button. If that doesn't give a wow effect!

## SUSTAINABLE

With our movable pool floor you do not only double the space, you also save energy and money. With the pool floor in the highest position you cover the entire swimming pool. That is good for the humidity in the room, and the water stays at the same temperature for much longer. Certainly for extra warm swimming pools in hotels, resorts and spas, this results in considerable savings for your wallet and the environment!

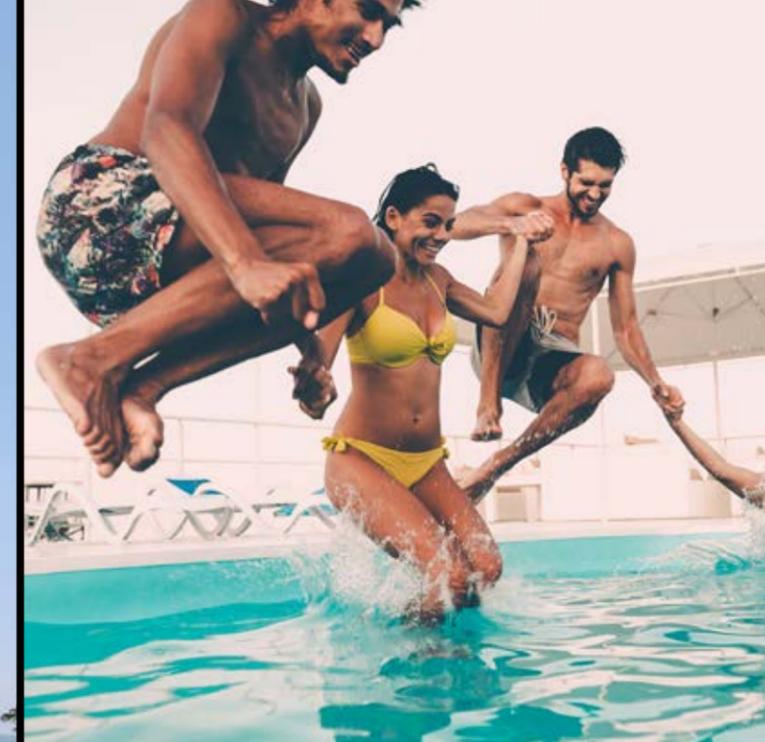

# VARIABLE HEIGHTS WITHOUT LIMITS

Depending on the purpose and your guests, our pool floors are adjustable at variable heights. With the push of a button you can make your swimming pool suitable for children playing or for training scuba divers.

We only use the highest quality stainless steel cables, which remain strong for many years under water.

We do not make any concessions when it comes to the quality and safety of our movable pool floors.

## GETTING INTO THE WATER IN STYLE

Our movable floors are based on a floating concept. Therefore there are no unsightly, moving parts in sight; the floor forms a beautiful whole with the surrounding space.

To get into the water in style, we also supply various solutions for stairs. We can design almost any type of staircase for you. Round, straight, wide or in a corner? Everything is possible. Even stairs that move up and down with the floor.

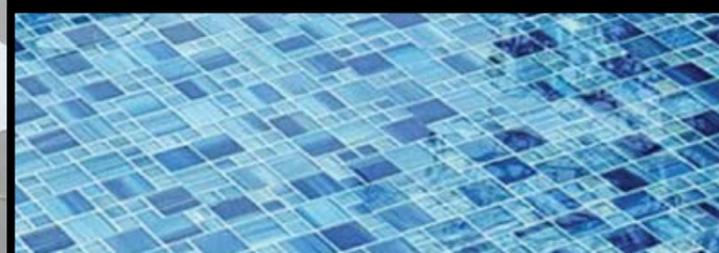

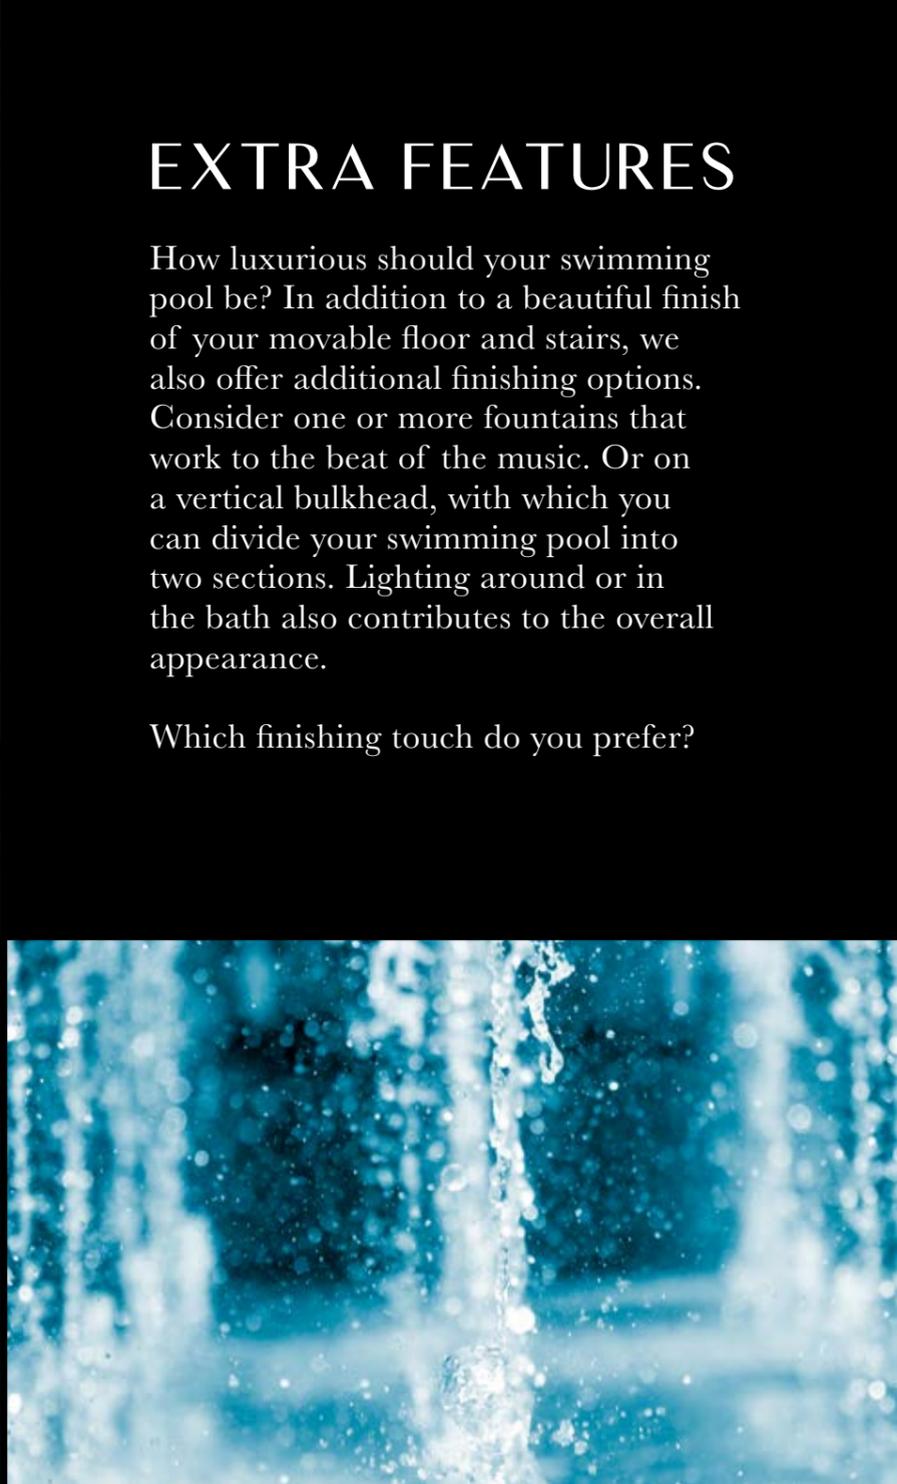

## THE FINISHING TOUCH

If you place the pool floor in the highest position, you naturally want it to form a beautiful whole with the space around it. Whether it's about your patio or living space. We can completely customize the top deck of the floor for you.

We use beautiful, luxury products for this, such as porcelain, marble, glass mosaic, granite, wood, limestone and many more. Fully transparent is also possible, so that you can still look into your swimming pool while walking or dancing. In particular, ask about the possibilities to have your floor fit seamlessly with your interior, or to turn it into a beautiful eye-catcher.

## EXTRA FEATURES

How luxurious should your swimming pool be? In addition to a beautiful finish of your movable floor and stairs, we also offer additional finishing options. Consider one or more fountains that work to the beat of the music. Or on a vertical bulkhead, with which you can divide your swimming pool into two sections. Lighting around or in the bath also contributes to the overall appearance.

Which finishing touch do you prefer?
